

Adaptable | Intelligent | Scalable

A BIA5 Cyborg Dynamics Engineering partnership, the Warfighter UGV is unmanned ground vehicle capable of offensive and support roles to the dismounted warfighter. It is the **lightest UGV in the world to effectively fire a 50 cal.**

Its small footprint makes it highly suitable for complex terrains such as jungle and urban operations

WARFIGHTER UGV

GO WHERE THE SOLDIERS GO

WARFIGHTER UGV

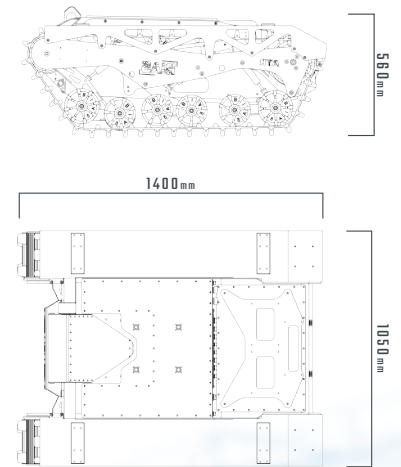

The product combined BIA5's patented 'go anywhere' suspension system with Cyborgs user interface and Athena AI for target evaluation. Other enhancements have been added to include onboard power generation, optics suite, various weapons options, collision avoidance and logistics configurations.

PLATFORM FEATURES

- 72 Hours Endurance
- Hybrid Electric Drive
- 50 Degree climb
- Integrated Fire Support
- Intelligent Driving Systems

DIMENSIONS

CONFIGURATIONS

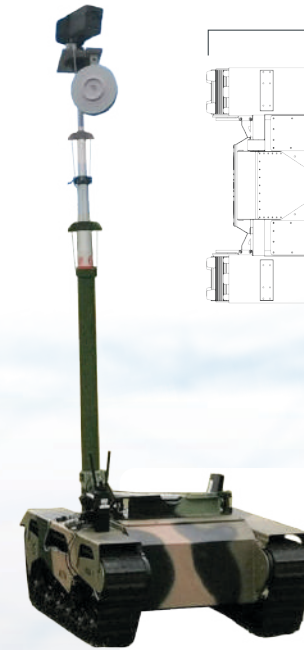

COUNTER UAS

Hard-kill and soft-kill options
Radar, EO and RF sensing

COMBINED ISR

Comms relay
UAV docking station
Target acquisition
Base Protection

ASSAULT

50 cal / 7.62
optional breacher head

ANTI AIR

Dual mounted FIM-92
Stingers

ATGM LAUNCHER

5km precision guided munition
Onboard targeting
Anti tank or hardened positions

LOGISTICS MULE

440kg usable payload with
load calculation
CASEVAC variant
